Lakeview Personal Care
Member of Doylestown Health

Noteworthy Financial Considerations:

Pine Run Lakeview works with residents and their families to provide the best care around the clock that is also affordable. Outstanding amenities and services come automatically for all residents. Those who may require enhanced levels of care as they age have additional service charges to help insure that no resident pays more

than they need to until the extra care is required.

Pine Run realizes that financial challenges can sometimes stand in the way of making the best healthcare decisions. Experienced staff in social and financial services will help families explore all possible solutions and any application process required.

Consider the following resources:

Value Added Services

- Access to the Pine Run continuum of care
 - Daily pharmacy deliveries
 - Physicians and specialists on site
-

Tax Deductibility Benefit

Current tax law provides that an individual can deduct from taxable income certain medical expenses associated with living in a personal care home. This deduction may apply for adult children or other family members who are paying a portion of a resident's costs associated with living here. Consultation with a tax professional is advised.

Veterans' Benefits

Veterans' benefits are available for U.S. veterans or the surviving spouses of a veteran. If eligible, you could receive a federal pension of anywhere from \$1,000 to over \$2,000 per month to help pay for personal care monthly fees.
