

Pine Run Lakeview Re-Opening Prerequisites
Implementation Plan

Date: August 17, 2020

Reviewed and Updated: October 27, 2020 // Updated March 15, 2021

Bucks County's positivity Rate is 6.5% (3/5/2021)

Develop a Re-Opening Implementation Plan	This will be posted on our website. www.pinerun.org	Effective: 8/17/20 Updated: 10/27/20 Updated: 1/15/21 Updated: 3/15/21
<p>A Testing Plan:</p> <p>County Positivity Rate is < 5%</p> <p>County Positivity Rate is 5% - 10%</p> <p>County Positivity Rate is > 10%</p>	<p>Baseline Universal Testing of all Residents and staff:</p> <p>Universal Testing is required every 4-6 weeks for all Associates. Resident testing is not recommended.</p> <p>UT testing for all Associates is every 30 days. Weekly testing is encouraged for all Residents with outside contact in the last 14 days, if they have not otherwise been tested during that period. Testing is encouraged of all Associates that have not been tested in the past 30 days and repeat testing every 30 days.</p> <p>Testing for all Associates is encouraged weekly. Weekly testing is encouraged of all Residents with outside contact in the last 14 days, if they have not otherwise been tested during that period.</p>	<p>Last COVID positive Resident was 12/23/20 Last COVID positive Associate was 2/11/21 Lakeview has been COVID free since 2/24/21</p> <p>Universal Testing for all Associates and will take place monthly due to the decrease in the Bucks County's positivity rate. 100% of all Associates and Residents test results returned negative 2/24/21.</p> <p>Residents who go out for medical appointments, return from the hospital, rehab or a LOA and New Admissions:</p> <ul style="list-style-type: none"> • Must return or move in with a negative COVID-19 test with the 72 hours • Resident will quarantine for 4 days in their room.

		<ul style="list-style-type: none"> Resident will be tested on day 4, if test results is negative Resident is out of isolation.
<p>Diagnostic Testing:</p>	<p>Residents showing signs and symptoms will be tested within 24 hours of showing signs and symptoms.</p> <p>Associates who are showing symptoms will contact Doylestown Hospital Occupation Health to arrange for testing.</p> <p>Non-essential staff and Volunteers will have to make arrangements to be tested independently. Associates may not decline universal testing. It is part of employment to be tested for COVID-19.</p> <p>Pine Run Community is owned by Doylestown Health and Lakeview as part of our CCRC has a contract with Doylestown Hospital's lab.</p>	<p>Resident showing symptoms will be tested at Lakeview by DON. Swab will be sent to DH lab. DON will obtain an order from PCP to be tested. Alternatively, if ordered due to severity of illness, 911 will be called and the Resident will be transported via ambulance to Doylestown Hospital for testing.</p> <p>Occupational Health will coordinate with the Associate an appointment time to come to DH for the testing.</p> <p>Effective 6/17/20 all Associates will tested for COVID-19 prior to employment and associates currently working will be tested as part of Universal Testing. HR policy has been developed and shared with all staff stating testing is required for employment.</p> <p>DH Lab will provide testing and results to our Infection Control Specialist.</p>
<p>Co-Horting Residents:</p> <p>Lakeview has capacity for 13 Residents living in our Secured Dementia Unit called The Arbor. Lakeview has capacity for 93 Residents in Lakeview Proper (regular PC). Current Census is 89.</p>	<p>Lakeview is not able to co-hort Residents who are symptomatic and ill:</p>	<p>If a Lakeview Resident tests positive for COVID-19 and they are ill and or wander, they will be transferred to Pine Run Health (our SNF) to the designated COVID unit. MD and Residents Responsible Party will be made aware of transfer. The Resident will remain in their room, in isolation, until the results of their test are available. Associates will use appropriate PPE (mask, gloves, face shield and gown) when entering the Residents room. They will don and dof the PPE inside the Residents room and dispose of trash in Biohazard bins.</p>

	If Resident is not ill and can be safely managed at Lakeview:	If a Lakeview Resident tests positive and is asymptomatic they will isolate in their room for 14 days. They will eat in their room. Associates who enter the room will wear appropriate PPE (mask, gloves, face shield and gown) when entering the Residents room. They will don and doff the PPE inside the Residents room and dispose of trash in Biohazard bins. PCP and family will be notified. PCP will also be contacted by DON to get order for COVID IgG testing to show if the virus is old or new.
Screening Tool:	All Associates are screened upon arrival and departure. Residents are screened twice daily by LPN / RN.	Attached please find the screening tool used by Associates. Resident temperatures and pulse oxygen levels are monitored by nurse and documented in their electronic medical record.
PPE / Infection Control:	PPE is provided to all Associates: Current PPE required as of 1/11/2021: If outbreak occurs:	We have an adequate supply of Proper PPE including: <ul style="list-style-type: none"> • Masks • Gloves • Gowns • Face shields • Hand sanitizer Surgical mask, face shields, gloves N95's will be required
Staffing:	Adequate staffing will be monitored	DON will monitor staffing needs
Communal Dining:	While adhering to the core principals of COVID-19 infection prevention, communal dining may occur even if a positive case comes up.	We will utilize the main dining room, private dining room and courtyard café in order to ensure social distancing during meal service. Hand sanitizer will be provided upon entering and exiting the dining room.

	<p>If an outbreak occurs, meals will be delivered to the resident's room who tested positive.</p>	<p>Meals will be delivered to Residents room until cleared from isolation (14 days).</p>
<p>Visitation is permitted by adhering to Core Principles of Infection Prevention:</p> <p>*Core Principles of COVID-19 Infection Prevention:</p>	<ul style="list-style-type: none"> • Screening of all who enter the facility for signs and symptoms of COVID-19 (e.g., temperature checks, questions about and observations of signs or symptoms), and denial of entry of those with signs or symptoms or those who have had close contact with someone with COVID-19 infection in the prior 14 days (regardless of the visitor's vaccination status) • Hand hygiene (use of alcohol-based hand rub is preferred) • Face covering or mask (covering mouth and nose) • Social distancing at least six feet between persons • Instructional signage throughout the facility and proper visitor education on COVID19 signs and symptoms, infection control precautions, other applicable facility practices (e.g., use of face covering or mask, specified entries, exits and routes to designated areas, hand hygiene) • Cleaning and disinfecting high-frequency touched surfaces in the facility often, and designated visitation areas after each visit • Appropriate staff use of Personal Protective Equipment (PPE) • Effective cohorting of residents (e.g., separate areas dedicated to COVID-19 care) <p>These core principles are consistent with the Centers for Disease Control and Prevention (CDC) guidance for personal care homes, and should be adhered to at all times.</p>	<p>Effective 3/15/2021</p> <p>These core principles are consistent with the Centers for Disease Control and Prevention (CDC) guidance for personal care homes, and should be adhered to at all times.</p>

	<p>Skype, Zoom and Face Time Calls are available:</p> <ul style="list-style-type: none"> • Life Enrichment will set up Resident to have a private conversation with their Family and / or Friends • Appointments made through the Life Enrichment Department <p>Communication Window visits:</p> <ul style="list-style-type: none"> • Families and Friends may set up a Communication Window visit through the Concierge. 1st floor by our Gazebo and The Arbor both have communication windows available • Lead Concierge will schedule all appointments so proper cleaning can happen in between visits. <p>Front Porch Visits:</p> <ul style="list-style-type: none"> • Available 7 days per week • Remember your chair! • Universal Masking and Social Distancing must be upheld during your visit. <p>Conference Room Visits (Inside):</p> <ul style="list-style-type: none"> • Visiting hours are available 7 days a week 9:30am – 11:00am and 1:30pm – 4pm • All inside visits must be scheduled by calling the Concierge at (215)489-7117 • Check in with the Concierge upon arrival to be screened • No food or drinks are permitted during the visit • Universal Masking must be upheld during your visit • Maintaining Social Distancing must be upheld during your visit • Only 2 people per visit • Visits may last 20 minutes • Proper cleaning and disinfecting will occur between each visit <p>In-Room Visits:</p> <ul style="list-style-type: none"> • Visiting times are Monday – Friday during the times of 10am – 12pm and 2pm – 4pm 	<p>Currently available</p> <p>Currently available</p> <p>Currently available</p> <p>Currently available</p> <p>Currently available</p>
--	--	--

	<ul style="list-style-type: none"> • Sign up is required for in-room visits by calling the Concierge • Only 2 person may visit at a time • Screening is required prior to visit and escort to and from the Residents room is required. • Universal Masking and adhering to social distancing is required at all times <p><i>Visitation inside is restricted during Meal Services</i></p>	
<p>Plan to HALT re-opening (if PA reverts back to RED PHASE)</p> <p>Co-Horting of Residents:</p>	<p>Any Resident who tests positive for COVID-19 and is symptomatic and ill, will be transferred to our SNF, Pine Run Health Center’s dedicated COVID unit.</p>	<p>If a Lakeview Resident tests positive for COVID-19 and they are ill and or wander, they will be transferred to Pine Run Health (our SNF) to the designated COVID unit. The Resident will remain in their room until the results of their test are available and transfer is arranged. Associates will use appropriate PPE (mask, gloves, face shield and gown) when entering the Residents room. They will don and dof the PPE inside the Residents room and dispose of trash in Biohazard bins. MD and Residents Responsible Party will be made aware of transfer.</p>
<p>Mandatory Reporting:</p>	<p>Positive Results for asymptomatic Residents will isolate in their room for the required 14 days.</p> <p>Lakeview will submit the mandatory Tracking Form and Incident Report to DHS when a test results is positive.</p>	<p>If a Lakeview Resident tests positive and is asymptomatic they will isolate in their room for 14 days. They will eat in their room. Associates who enter the room will wear appropriate PPE (mask, gloves, face shield and gown) when entering the Residents room. They will don and dof the PPE inside the Residents room and dispose of trash in Biohazard bins. PCP and family will be notified.</p> <p>Immediate notification to DHS by submitting required Tracking Form and Incident report.</p>

<p>Testing Plan:</p> <p>Infection Control and Personal Protective Equipment (PPE):</p> <p>*Visitor Policy: (see below excerpt from CMS guidelines)</p> <p>Life Enrichment:</p> <p>Dining:</p> <p>Individual Test of Resident due to signs and symptoms:</p> <p>If outbreak has occurred:</p>	<p>We will continue to Universally Test Associates and Residents weekly. All testing will be completed through Doylestown Hospital. Swabs and test results will be administered at DH and DH lab.</p> <p>All PPE will be provided to staff. Screening tool will be utilized to monitor all staff. Residents will be screened twice daily.</p> <p>All Visitors will be restricted inside until the first round of outbreak testing reveals no additional COVID-19 cases. Communication window, FaceTime and Skype call Assistance will be offered.</p> <p>During an outbreak activities are permitted.</p> <p>If we are waiting on COVID results for a Resident, that Resident will eat in their room if safe, until the results are in.</p> <p>All meals will be delivered to the Residents who tested positive for 14 consecutive days. After isolation the Resident will be cleared to resume eating in the main dining room.</p>	<p>Director of Nursing and Infectious Disease Preventionist will coordinate with DH for testing and results. (staff and resident)</p> <p>Lakeview will provide all PPE to staff and Residents.</p> <p>Lakeview will restrict inside visitors temporarily if outbreak is identified. Communication Window visits, FaceTime and skype calls will be arranged through the Concierge and Life Enrichment Departments.</p> <p>Activities are permitted with social distancing, hand hygiene and universal masking.</p> <p>While waiting on test results for Resident, Resident will have meals delivered to their room.</p> <p>All meals will be delivered to the Residents room until isolation is completed.</p>

***Indoor Visitation during an Outbreak**

(CMS guidelines 3/10/2021)

When a new case of COVID-19 among residents or staff is identified, a facility should immediately begin outbreak testing and suspend all visitation until at least one round of facility-wide testing is completed. Visitation can resume based on the following criteria:

- If the first round of outbreak testing reveals no additional COVID-19 cases in other areas (e.g., units) of the facility, then visitation can resume for residents in areas/units with no COVID-19 cases. However, the facility should suspend visitation on the affected unit until the facility meets the criteria to discontinue outbreak testing. o For example, if the first round of outbreak testing reveals two more COVID-19 cases in the same unit as the original case, but not in other units, visitation can resume for residents in areas/units with no COVID-19 cases.
- If the first round of outbreak testing reveals one or more additional COVID-19 cases in other areas/units of the facility (e.g., new cases in two or more units), then facilities should suspend visitation for all residents (vaccinated and unvaccinated), until the facility meets the criteria to discontinue outbreak testing. While the above scenarios describe how visitation can continue after one round of outbreak testing, facilities should continue all necessary rounds of outbreak testing. In other words, this guidance provides information on how visitation can occur during an outbreak, but does not change any expectations for testing and adherence to infection prevention and control practices. If subsequent rounds of outbreak testing identify one or more additional COVID-19 cases in other areas/units of the facility, then facilities should suspend visitation for all residents (vaccinated and unvaccinated), until the facility meets the criteria to discontinue outbreak testing.

NOTE: In all cases, visitors should be notified about the potential for COVID-19 exposure in the facility (e.g., appropriate signage regarding current outbreaks), and adhere to the core principals of COVID-19 infection prevention, including effective hand hygiene and use of face-coverings.

***Core Principals of COVID-19 Infection Prevention**

(CMS guidelines 3/10/21)

- Screening of all who enter the facility for signs and symptoms of COVID-19 (e.g., temperature checks, questions about and observations of signs or symptoms), and denial of entry of those with signs or symptoms or those who have had close contact with someone with COVID-19 infection in the prior 14 days (regardless of the visitor's vaccination status)
- Hand hygiene (use of alcohol-based hand rub is preferred)
- Face covering or mask (covering mouth and nose)
- Social distancing at least six feet between persons
- Instructional signage throughout the facility and proper visitor education on COVID19 signs and symptoms, infection control precautions, other applicable facility practices (e.g., use of face covering or mask, specified entries, exits and routes to designated areas, hand hygiene)
- Cleaning and disinfecting high-frequency touched surfaces in the facility often, and designated visitation areas after each visit
- Appropriate staff use of Personal Protective Equipment (PPE)

*Note: These core principles are consistent with the Centers for Disease Control and Prevention (CDC) guidance for personal care homes, and should be **adhered to at all times.***
